

WWE Assignment 1 (1st two questions and 3rd Question Prep)

Wednesday, September 10, 2025 4:17 PM

1. Find any legal disclaimer or user manual that you have at home and take a closer look at it. What is it that makes it a document of technical writing? What kind of language does the author use? How is it organized? Provide a paragraph of your observations, along with a link to the document or a screenshot of its first page.

1/5 points

Chosen user Manual: Zinus(Company) Platform Bed Frame Twin Size

Firstly, this user manual addresses the needs of customers who have purchased this product by providing an instruction manual that any customer can follow. Also, it helps customers avoid problems by providing a clear guideline to follow and tips to avoid working backwards. For instance, in page 6, it advises slightly loosening all bolts before assembly to do what I just stated earlier. Their values include a commitment to sustainability, top quality at an affordable price, and easy assembly. This is evident as they've used materials such as recycled foams and Tencel, and also ensure to reduce their carbon footprint by making their products fit in smaller boxes. Another quality of this manual is design and the usage of images to show you exactly how you are supposed to build this, which fulfills their objective of being easy to assemble.

The language used by the author is professional, direct, and in an imperative tone akin to an instructor telling a student how to solve a problem(i.e what steps they should take to do it). Its organization is similar to a brochure with the first page showcasing the bed fully built and the company followed by the bed type underneath. Then the page is followed by a components part, highlighting/labeling each piece required to build it. Finally, the next pages are visual steps with diagrams of building the bed step-by-step.

Link to the manual

<https://manuals.plus/m/fe5f9cc58bd979ae4eaafecd304c65a0736e51c0d60177c7b60308b0e416501f>

2. Visit the two links below. Each of them involves technical writing. Choose one and explain in a paragraph why you think it is an efficient or inefficient document of technical writing?

A) How to Dye your Hair at Home Like a Pro:

<https://www.glamour.com/story/how-to-color-your-hair-at-home>

B) How to Finely Chop an Onion—by Gordon Ramsey:

<https://ftp.xhuliocooks.com/tips-tricks/how-to-finely-chop-an-onion-by-gordon-ramsay/>

1/5 points

I chose option b). I believe it is an inefficient piece of technical writing as a complete beginner to cooking its very vague and fails to give clear, concise instructions. In fact, the video is a far better explanation than the instructions, which illustrates my point as it should the video should be supplementary to the instructions, not be the explanation itself.

3. Following the guidelines and template on slides 18 and 19 of Lecture 1 (Week 2), write a simple set of instructions on a subject of your own choice (how to cook macaroni & cheese, bake a cake, save a document on USB, open a bank account, etc.). This exercise is a hands-on experience increasing a document of technical writing. Pay attention to the appropriate format, language, and tone; feel free to add any visual aids: photographs, screenshots, drawings, etc. to illustrate your instructions. Length: 1 or 1 ½ pages. Provide a Reference page for any secondary sources and images used.

3/5 points

1. Audience: TA attitudes: Climate activist, IT professional, writing as the most important skill I will learn expectations: that I take this course seriously
2. Purpose: For my readers to know what are the necessary components of the army, what to look for when scouting a potential target(base), how to execute the strategy, how to avoid common mistakes and how to consistently get success with their army
3. Journalistic Question
 - a. Who is this guide for? (newbies, intermediate, experienced)
 - b. What town hall is it for? Type of strategy? Base requirements for strategy? Things out to look out for(key objectives to ensure success in strategy) Heros that should be used? General components required for the strategy? Common mistakes and pitfalls that doom the attack?
 - c. When should it be used (for war? Farming? Trophy Pushing?) Can you think the attack will be a success(key objectives taken down or time of the attack)
 - d. Where should the attack start? (if applicable where should 2nd or 3rd phase start from)
 - e. Why should a player learn this strategy (its easy, meta, viable in multiple town halls, low cost for equipment and other components of army) (it makes them learn valuable skills that are applicable across other strategies) (makes them look good/skillful which

1. Addresses Particular

Readers: Tailored to the audience's needs, background, and culture.

2. Helps Readers Solve

Problems: Provides actionable information.

3. Reflects Organizational

Goals and Culture: Aligns with the organization's values and objectives.

4. Produced Collaboratively:

Created by teams of experts and communicators.

5. Uses Design to Increase

Readability: Employs typography, color, and layout for clarity.

6. Consists of Words or Images

or Both: Combines text and visuals to enhance understanding

Slide 18 guidelines (process of writing a tech document)

1. Analyse your audience, their attitudes and expectations.
2. Define and analyze your purpose.
3. Brainstorm about your subject: ask who, what, when, where, why and how.
4. Conduct research for additional information.
5. Create an outline for your document.
6. Select your delivery method, design, and application.
7. Create a draft, using templates and style.
8. Edit and revise the draft for grammar, punctuation, diction, mechanics (abbreviations, capitalization, use of numbers), etc.

Slide 19 Guidelines (key elements for writing a set of instructions)

1. Clear, Indicative Title
2. Informed, Well-researched Content to avoid inaccurate/faulty and therefore risky instructions
3. Use of Visuals—diagrams, charts, photographs, tables, icons, etc.
4. Appropriate Level of Technicality
 - o Provide a brief background for the readers
 - o Explain each step in detail
 - o Add examples to visualize the procedures
5. Logically Ordered Steps—order the stages/steps chronologically
6. Warnings, Cautions, Notes—use text, frames, or signs (Fire, Danger, etc.)

- from)
- e. Why should a player learn this strategy (its easy, meta, viable in multiple town halls, low cost for equipment and other components of army) (it makes them learn valuable skills that are applicable across other strategies) (makes them look good/skillful which increases the likelihood of them being accepted into good clans) (it's fun, op)
- f. How can they apply this strategy consistently against different base designs? Optimize their lab upgrades to ensure this army is maxed out ASAP? Keep the same or similar army as the progress through the game?(ie town halls) How can they avoid pitfalls and common mistakes? How can they improve the strategy or rather their execution of it?

4. Strategy chosen: RC Charge Mass Dragons

- What I already know
 - I know its an air strategy
 - I know it can be used from TH13 - TH17
 - It's very simple strategy overall however the RC charge can be complicated as well the timing of invisibility spells
 - Army components
 - Heros used
 - Ideal equipment(not 100% sure might have to check a few sources to confirm it's what it used to be as I haven't played in a few a weeks)
 - Key objectives to ensure success
 - Common mistakes/pitfalls that lead to failure of attack
 - Worst defences against this strategy(to watch out for)
 - How to do the attack/explain it
- What I need to know
 - Army composition for each town hall level
 - Key defences you should target at each town hall level
 - Best bases this strategy works against(although from my experience it can work against any still going just check which base is the easiest one)
 - Common mistakes(I already know the major ones but more research into a few more would be nice)
 - Best Clan castle troops
 - Where to place your other heroes

- 5. Logically Ordered Steps—order the stages/steps chronologically
- 6. Warnings, Cautions, Notes—use text, frames, or signs (Fire, Danger, etc.)
- 7. Appropriate Style—use clarity of meaning and specific details; avoid long sentences and vague expressions; use transitional words like “in addition”, “meanwhile”, “next”
- 8. Active Voice and Imperative Mood (giving commands: “Insert the CD”, “Press the button”)
- 9. Affirmative Phrasing (“Assure the safety of your equipment”)
- 10. Effective Page Design—add headings and subheadings, numbers for all steps, spacing, highlighting, capitals, bold, italics, asterisks, etc.
- 11. Balance between Text and Visuals -- experiment to find the most effective design; see what works for you.

WWE Assignment 1 Outline

2:04 PM

Royal Champion Charge Mass Dragons Attack Strategy

Introduction

Clash of clans is a free-to-play strategy game that was first launched in 2012 developed by Supercell a game company based in Finland. It is one of the top games since 2012 with approximately 150 million players tuning in each month. In addition, it has amassed 4 billion downloads generating \$10 billion in revenue making it one of the highest grossing games worldwide. A common issue most players have is acquiring a consistent reliable strategy that can secure 3 stars in any setting especially more competitive settings such as Clan War and Clan War League. This document presents the Royal Champion Charge Mass Dragons Army an easy and effective approach to achieve maximum results. This guide will cover the basics of the army, how to execute it, key objectives to ensure success and common mistakes/pitfalls to avoid.

Army Composition & Requirements

Requirements (Must haves)

- Must be at least Town Hall 13
- **Must have Electric Boots** (If you don't have this forget it)
- Must have Dragons at either maximum level(ideal) or one level below maximum level(acceptable)
- Must have heros at maximum level for the previous Town Hall level
 - o Ex: my account is a Town Hall 15 so in order for this strategy to be effective I must have maximum hero levels for Town Hall 14
 - o Order of precedence for Heros: RC, GW, AQ, BK or MP(can pick whichever is higher)
- Must have maxed out Invisibility Spell

Optional Requirments (Nice to have)

- Maxed out Heros
- Maxed out equipment
- Maxed out pets

*The more optional requirments you meet the higher your chance of success

Army compositions

TH13

- Troop
 - o Maximum # of Dragons
- Spells
 - o Maximum # of Invisibilty spells
- Clan Castle
 - o Two Dragons or Dragon Riders and three ballons + 1 rage and 1 poison with Stone Slammer
- Heros
 - o Royal Champion (equipment: Electric boots + rocket spear or seeking shield)
 - o Grand Warden (equipment: Eternal tome + Healing tome)
 - o Archer Queen (equipment : Giant Arrow + healer puppet)
 - o Minion Prince (equipment : Dark Orb + Dark crown)

Slide 19 Guidelines (key elements for writing a set of instructions)

1. Clear, Indicative Title
2. Informed, Well-researched Content to avoid inaccurate/faulty and therefore risky instructions
3. Use of Visuals –diagrams, charts, photographs, tables, icons, etc.
4. Appropriate Level of Technicality
 - o Provide a brief background for the readers
 - o Explain each step in detail
 - o Add examples to visualize the procedures
- 5. Logically Ordered Steps –order the stages/steps chronologically
- 6. Warnings, Cautions, Notes – use text, frames, or signs (Fire, Danger, etc.)
- 7. Appropriate Style – use clarity of meaning and specific details; avoid long sentences and vague expressions; use transitional words like “in addition”, “meanwhile”, “next”
- 8. Active Voice and Imperative Mood (giving commands: “Insert the CD”, “Press the button”)
- 9. Affirmative Phrasing (“Assure the safety of your equipment”)
- 10. Effective Page Design—add headings and subheadings, numbers for all steps, spacing, highlighting, capitals, bold, italics, asterisks, etc.
- 11. Balance between Text and Visuals -- experiment to find the most effective design; see what works for you.

TH14

- Troop
 - o Maximum # of Dragons
- Spells
 - o Maximum # of Invisibilty spells
- Clan Castle
 - o Two Dragons or Dragon Riders and three ballons + 1 rage and 1 poison with Stone Slammer
- Heros
 - o Royal Champion (equipment: Electric boots + rocket spear or Hog puppet)
 - o Grand Warden (equipment: Eternal tome + Healing tome)
 - o Archer Queen (equipment : Giant Arrow + healer puppet)
 - o Minion Prince (equipment : Dark Orb + Dark crown)
- Pets
 - o Lassi -> Royal Champion
 - o Electric Owl -> Grand Warden
 - o Yak -> Minion Prince
 - o Unicorn -> Archer Queen

TH15

- Troop
 - o Maximum # of Dragons
- Spells
 - o Maximum # of Invisibilty spells
- Clan Castle
 - o Two Dragons or Dragon Riders and three ballons + 1 rage and 1 poison with Stone Slammer
- Heros
 - o Royal Champion (equipment: Electric boots + rocket spear or Hog puppet or Haste vial)
 - o Grand Warden (equipment: Eternal tome + Healing tome)
 - o Archer Queen (equipment : Giant Arrow + healer puppet)
 - o Minion Prince (equipment : Dark Orb + Dark crown)
- Pets
 - o Diggy -> Royal Champion
 - o Electric Owl -> Grand Warden
 - o Phoneix -> Minion Prince
 - o Frosty -> Archer Queen

TH16

- Troop
 - o Maximum # of Dragons
- Spells
 - o Maximum # of Invisibilty spells
- Clan Castle
 - o Two Dragons or Dragon Riders and three ballons + 1 rage and 1 poison with Stone Slammer
- Heros
 - o Royal Champion (equipment: Electric boots + rocket spear or Hog puppet)
 - o Grand Warden (equipment: Eternal tome + Healing tome)
 - o Archer Queen (equipment : Giant Arrow + healer puppet)
 - o Minion Prince (equipment : Dark Orb + Dark crown)
- Pets
 - o Spirit Fox-> Royal Champion
 - o Diggy-> Grand Warden
 - o Phoniex -> Minion Prince
 - o Frosty -> Archer Queen

TH17

- Troop
 - o Maximum # of Dragons
- Spells
 - o Maximum # of Invisibilty spells
- Clan Castle
 - o Two Dragons or Dragon Riders and three ballons + 1 rage and 1 poison with Stone Slammer
- Heros
 - o Royal Champion (equipment: Electric boots + rocket spear or Hog puppet)
 - o Grand Warden (equipment: Eternal tome + Healing tome)
 - o Archer Queen (equipment : Giant Arrow + healer puppet)
 - o Minion Prince (equipment : Dark Orb + Dark crown)
- Pets
 - o Spirit Fox-> Royal Champion
 - o Diggy-> Grand Warden
 - o Phoniex -> Minion Prince
 - o Frosty -> Archer Queen

General Strategy

Royal Champion Charge Mass Dragons can be broken into 3 steps

1. Royal Champion Charge
 - o You should start the charge depending which key objectives you plan to take out
 - o Once you've decided which targets you want to aim for a defense near the corner of the map this makes it much easier to setup a funnel for the later phase of the attack
 - o Drop an Invisibility spell once multiple defences target the royal champion continue to do so every 4 seconds
 - o Afterwards you should have exhausted all your invisibility spells and have taken out most of the key objectives if not all of them
 - o Now we can move to phase two
2. Completing the Funnel
 - o Drop your other heros(king or minion prince) on either side of the intial corner you dropped your RC
 - When in doubt drop it where you can the most value without all your heros dying suddenly if they die too quickly that could result in a failed attack as there will less troops to clean up the rest of the base
 - o Now we can move on to the last phase
3. Deploying the dragons(main force of army)
 - o Deploy all the dragons not in one spot not too spread apart but just spread part enough to ensure they take care of different targets
 - o Deploy the Grand Warden and Minion prince(if you chose it) behind them
 - o Deploy early minion prince ability (if you have it)
 - o Save Grand Warden's ability for the core if Town hall is still up if not then use it when the main force reaches a place where there is a lot of powerful defences

Key Objectives

1. Pathing: This simply means you want to remove a portion of the base to better control where the main force of your army will go
2. Key defences (this depends on the town hall you are at as it differs from town hall to town hall)
 - *Order of defences from left to right (left being the most powerful and dangerous at the given townhall)
 - o At TH13 (1. Scattershots, 2. Town hall, 3. Eagle Artillery)
 - o At TH14 (1. Scattershots, 2. Town hall, 3. Eagle Artillery) no changes except watch out for builder huts they don't much damage but heal other defences which can be nuisance especially for the 1st phase
 - o At TH15 (1. Monolith, 2. Town Hall, 3. Eagle Artillery) Spell towers are powerful however they are typically nearby the other defences listed above so if you for them you'll run into them as well
 - o At TH16 (1. Monolith, 2. Town Hall, 3. Multi-Archer tower)
 - o At TH17 (1. Monolith, 2. Fire spitter, Multi-Archer tower)

Common Mistakes/Pitfalls

1. Royal Champion dying prematurely
 - a. Avoid sending RC into overwhelming clusters of *powerful defenses*
 - i. Good example: Sending her to an area with a monolith, inferno tower, x-bow and warden

- i. Bad example: Send her to an area with a monolith, four ground x-bows, 2 single inferno towers, all 4 defensive heros and CC

- a. Ensure you're deploying the invisibility spells every 4 seconds and covering her with it
 - i. Don't panic if she leaves the spell simply drop another one on her and take a deep breath
1. Support Heros not enough value or dying early
 - a. Deploy them where they can take out a ton of buildings while not being under heavy fire

2. Dragons not going to core or fanning out
 - a. Ensure you funnel properly as core defenses will remain standing

⚠ **Consequence:** Often leads to a 2-star high percentage attack rather than a 3-star.

Bases Designs

- This strategy in my experience can be used against any base however there are some its better than others
- Ring bases - this is worst matchup its still possible to beat however you need ensure your funnel is perfect as the core usually has all the key defences so failing to funnel means failing the raid. Fortunately there are is another way bringing a battle blimp(with Yeti's inside) will always go to the core provided the town hall is there ensuring the core is gutted securing the victory
- Anti-3 star bases - easy match up as typically Air defences are outside easily accessible and key defences are scattered giving the charge and the 2nd phase ample value

Optimization

- As simple and easy as this army is it means nothing if its not maxed or certain components are lacking so heres some simple steps to follow to ensure your army is good to go

Lab

- Use your hammer of fighting on Dragons

Heros

- Use your hammer of heros on Royal Champ
- Then Grand Warden
- Then Archer Queen
- Then Barbarian King or Minion Prince

Equipment

- Max out first Eternal Tome
- Then Electric Boots
- Then Giant Arrow
- Then Earthquake Boots
- Then Healing Tome
- Then Rocket Spear
- Then Healer Puppet
- Then Spiky Ball

Pets

- Max out unicorn
- Then max out electric owl
- Then max out phoneix
- Then max out diggy
- Then max out frosty
- Then max out spirit fox

*Note magic items can drastically speed up this process so feel free to use where you see fit

Tips

1. Practice
 - a. After watching or in your case reading this you might feel confident and eager to try and that's great but if you want to be successful you need to put the reps lucky for you supercell has added tons of ways to practice heres a list of a few of them

- i. Friendly challenge - challenge a clanmate to attack your base or you attack his either way both you will get better
- ii. Attack your own base - a nice solo friendly way to improve
- iii. Go an attack in multiplayer - classic way of improving although if you fail you will have to face the consequences

That concludes my guide thanks for reading!

Royal Champion Charge Mass Dragons Attack Strategy

Sunday, September 14, 2025 1:35 PM

Figure 1: Logo of Clash of Clans (Supercell, 2012).

Introduction

Clash of Clans is a free-to-play strategy game that was first launched in 2012, developed by Supercell, a game company based in Finland (Supercell, 2012). It is one of the top games since 2012, with approximately 150 million players tuning in each month (Levvvel, 2023). In addition, it has amassed 4 billion downloads, generating \$10 billion in revenue, making it one of the highest grossing games worldwide (Business of Apps, 2025). A common issue most players have is acquiring a consistent, reliable strategy that can secure 3 stars in any setting, especially in more competitive settings such as Clan War and Clan War League. This document presents the **Royal Champion Charge Mass Dragons Army** with an easy and effective approach to achieve maximum results. This guide will cover the basics of the army, how to execute it, key objectives to ensure success, and common mistakes/pitfalls to avoid.

Figure 2: Player count of Clash of Clans (ActivePlayer.io, 2025).

Labels / Definitions

Term	Definition
RC	Royal Champion, a hero used to take out key defenses.
Charge	Sending a hero into the base to destroy a target.
TH	Town Hall, the headquarters of the village.
GW	Grand Warden, a supporting hero.
AQ	Archer Queen, a hero specializing in ranged DPS.
BK	Barbarian King, a melee-focused hero.
MP	Minion Prince, a hybrid hero for supporting attacks.
Max	Maximum level for the specific Town Hall.
Funnel	Removing exterior buildings to guide your army into the core.
Core	Center of the base, typically housing the most powerful defenses.
Key Objectives	Targets that must be destroyed to maximize attack success.
DPS	Damage per second, a measure of a troop's attack power.
3-star	Maximum success achievable in-game, earned by completely destroying an enemy base.

Army Composition & Requirements Table

Town Hall Level	Troops	Spells	Clan Castle	Heroes (Equipment)	Pets
TH13	Max Dragons	Max Invisibility	2 Dragons or Dragon Riders + 3 Balloons + Rage + Poison (Stone Slammer)	RC: Electric Boots + Rocket Spear; GW: Eternal Tome + Healing Tome; AQ: Giant Arrow + Healer Puppet; MP: Dark Orb + Dark Crown	—
TH14	Max Dragons	Max Invisibility	Same as TH13	Same as TH13	RC → Lassi; GW → Electric Owl; AQ → Unicorn; MP → Yak
TH15	Max Dragons	Max Invisibility	Same as TH13	RC: Electric Boots + Rocket Spear/Hog Puppet/Haste Vial; GW: Eternal Tome + Healing Tome; AQ: Giant Arrow + Healer Puppet; MP: Dark Orb + Dark Crown	RC → Diggy; GW → Electric Owl; AQ → Frosty; MP → Phoenix
TH16	Max Dragons	Max Invisibility	Same as TH13	Same as TH15	RC → Spirit Fox; GW → Diggy; AQ → Frosty; MP → Phoenix
TH17	Max Dragons	Max Invisibility	Same as TH13	Same as TH15	Same as TH16

★ Note: Treat army composition as a general guideline. Adjust it to suit your preferences as needed.

Figure 3: Army composition of the RC Charge Mass Dragons strategy (Supercell, 2012).

General Strategy

Royal Champion Charge Mass Dragons can be broken into 3 steps.

1. Royal Champion Charge
 - Identify key objectives you plan to take out (e.g., Monolith, Town Hall, Fire Spitters).
 - Next deploy the RC near a corner closest to the key objectives you've decided to take out.
 - Drop an Invisibility spell once multiple defenses target the royal champion continue to do so every 4 seconds.
 - Ensure you don't drop the invisibility too early or cover the key defenses.
 - Continue until you have either exhausted all your invisibility spells or your RC has cleared out the key objectives.
 - Transition to funnel setup.

⚠ **Caution:** If you send the RC into an area where there is a high concentration of powerful defenses(e.g., Monolith + 4 X-bows + Spell towers + Infernos), she will die prematurely, and the attack will fail.

Figure 4: Showcasing how phase 1 will play out (Supercell, 2012).

2. Completing the Funnel

- First Drop your Queen on the other side of the funnel created by the RC.
 - Ensure she is placed where triggering her ability will allow her to take out at least 1 air defense.
- Now you can drop your other heroes(king or minion prince) alongside your Queen to support her with setting up the funnel.
 - When in doubt **drop it where you can the most value without all your heroes dying suddenly.**
- Transition to the last phase.

💡 **Tip:** If your funnel is weak, the Dragons may fan out and miss the base's strongest defenses.

Figure 5: Illustrating what will occur during phase 2 (Supercell, 2012).

3. Deploying the dragons

- Deploy all the dragons in a line not clumped, but not too spread.
- Deploy the Grand Warden and Minion prince(if you chose it) behind them.
- Deploy early minion prince ability (if you have it).
- Save Grand Warden's ability for the core.
 - As they approach the Town hall.
 - To protect them from powerful defenses in the base's core.

Figure 6: Illustrating the final phase of the attack (Supercell, 2012).

💡 **Tip:** Drop 1 or 2 Dragons on the side for clean up

Key Objectives

1. Pathing: Removing a portion of the base to better control Dragon movement.
2. Priority defenses(by Town Hall)
 - TH13: Scattershots > Town hall > Eagle Artillery.
 - TH14: Scattershots > Town hall > Eagle Artillery (watch out for builder huts as they can heal now).
 - TH15: Monolith > Town Hall > Eagle Artillery (Spell towers nearby can be dangerous).
 - TH16: Monolith > Town Hall > Multi-Archer tower.
 - TH17: Monolith > Town Hall > Multi-Acher tower.

Figure 7: Follow the general order of defense priorities shown below for all town halls. Consult your specific town hall for tailored recommendations.

Common Mistakes/Pitfalls

1. Royal Champion dying prematurely
 - a. Avoid sending RC into overwhelming clusters of *powerful defenses*.
 - i. Good example: Sending her to an area with a monolith, inferno tower, x-bow and warden.

Figure 8: Illustrating what constitutes good value for RC charge (Supercell, 2012).

- i. Bad example: Send her to an area with a monolith, four ground x-bows, 2 single inferno towers, all 4 defensive heroes and CC.

Figure 9: Illustrating what constitutes bad value for RC Charge (Supercell, 2012).

- a. Ensure you're deploying the invisibility spells every 4 seconds and covering her with it.
 - i. Don't panic if she leaves the spell; simply drop another one on her and take a deep breath.
 1. Support Heros not enough value or dying early.
 - a. Deploy them where they can take out a ton of buildings while not being under heavy fire.
 2. Dragons not going to core or fanning out.
 - a. Ensure you funnel properly as core defenses will remain standing.
- ⚠ **Consequence:** Often leads to a 2-star high percentage attack rather than a 3-star.

[5 Biggest Mistakes All Noobs Make in Clash of Clans](#)

Figure 10: Video featuring poor funnels and pathing mistakes (Judo Sloth, 2021).

Proper funneling

- o Proper funneling ensures your troops get to the core of the base.
- o ☒ This allows them to eliminate the Town Hall and high-value defenses quickly, raising the chance of a 3-star.

[5 Biggest Mistakes All Noobs Make in Clash of Clans](#)

Figure 11: Video featuring how to do a successful funnel (Judo Sloth, 2021).

Bases Designs

- o This strategy, in my experience, can be used against any base; however, some bases are better matches than others.
- o **Ring Bases:** These are the worst matchup. It's still possible to beat them, but you must ensure your funnel is perfect since the core usually contains all the key defenses. Failing to funnel typically results in a failed raid. Fortunately, an alternative is to use a **Battle Blimp** (with Yetis inside), which will go directly to the core if the Town Hall is present, guaranteeing that the core is gutted and securing the victory.
- o **Anti-3 Star Bases:** These are easier matchups. Air defenses are often outside and accessible, and key defenses are scattered, giving both the Royal Champion charge and the second phase of the attack ample value.

Figure 12: Video featuring how to take on Ring bases and Anti 3-star bases (CorruptYT, 2025).

Tips for Success

1. Practice Regularly

- After reading this guide, you may feel confident and eager to try the strategy. That's great! To be successful, you need to put in the reps. Fortunately, Supercell has added several ways to practice:
 1. **Friendly Challenge** – Challenge a clanmate to attack your base, or attack theirs. Both options help you improve.
 2. **Attack Your Own Base** – Use a solo practice to test funneling, troop placement, and timing.
 3. **Multiplayer Attack** – The classic method for improvement. Note: mistakes here carry real consequences, so use this after practicing the first two methods.
